Discharger and Tentative Order Information

The River Highlands Community Services District (CSD) is the owner of the Hammonton Gold Village Wastewater Treatment Plant (Facility), a publicly-owned treatment works. The County of Yuba (Yuba County) is the operator of the Facility. Gold Village Land Development LLC (Gold Village) owns the property at 8204 Platinum Circle, in Hammonton Gold Village, Yuba County, on which the Facility is located. Together, River Highlands CSD, Yuba County, and Gold Village are hereinafter referred to as the Discharger. Currently, the Olivehurst Public Utility District operates the Facility under contract to Yuba County. The Facility provides sewerage service for the community of Hammonton Gold Village and serves a population of approximately 210. The design average dry weather flow capacity of the Facility is 0.026 million gallons per day. The Facility discharges tertiary treated wastewater to an unnamed tributary to Sanford Creek, a water of the United States, seasonally from 1 October through 30 April and to land, by way of spray fields, when not discharging to surface water.

Discharges from the Facility are currently regulated by Waste Discharge Requirements Order R5-2017-0037, issued by the Central Valley Regional Water Quality Control Board (Central Valley Water Board) on 7 April 2017. An Order is proposed to renew the NPDES permit. The tentative Order includes new or updated effluent limitations for ammonia, biochemical oxygen demand, nitrate plus nitrite, and total suspended solids. The tentative Order removes effluent limitations for mercury and flow because reasonable potential does not exist in the effluent for mercury and flow is not a pollutant. The tentative Order will also remove mass limitations for ammonia, biochemical oxygen demand, total suspended solids because they are redundant. Removal or reduction of these effluent limitations will not result in an increase in the pollutants or in the degradation of the receiving water.

The tentative Order also includes new numerical Land Discharge Specifications for biochemical oxygen demand and total coliform organisms.
